

As a service provider and brand our business policy is based on a long term, trustful and fair cooperation with our clients and business partners. As a result the quality policy of Scholz Promotion Service and our values are firmly positioned in development since our foundation in 1921.

Quality does not only consider product quality. It is also a benchmark for all company services and departments. Our internal program for constant improvement aims to achieve a maximum of client satisfaction. Likewise we take over responsibility for environment and reduce negative effects by setting targets of our environmental behaviour in daily work.

Quality means that our products and services are not based on child work and labour exploitation. For this reason Scholz Promotion Service is running a corporate social responsibility program and is an active member of BSCI, operated by the FTA (Foreign Trade Association).
